

DOOR RELEASE UNITS – FLOOR-MOUNT FIRE DOOR HOLDERS

**FLOOR-MOUNT
FIRE DOOR HOLDER**

DESCRIPTION

Floor-mounted Door Holders are designed to hold open fire doors for ease of access and release them when an alarm is triggered.

These units are ideally suited to applications where maximum protection is needed against vandalism or accidental damage, such as in prisons and schools.

Geofire floor-mounted door holders are also suited to applications where the door is not opening near a wall. They feature a rugged cast aluminium housing, a holding magnet with integral ejection pin, and a manual release switch.

Cable entry can be through the base or through a 20mm hole provided in the housing for surface mounted conduit.

Versions offer 200N or 500N holding force options in either standard or vandal-resistant form. The range also includes low wattage versions, heavy-duty switch versions, and alternative keeper designs and voltages.

Each door holder is supplied complete with a door mounting keeper plate.

FEATURES

- 2 Year Warranty
- Approved to EN 1155 & CE Marked
- Robust Aluminium Construction
- 200N or 500N Holding Force Option
- Manual Release Switch
- Surface Cable Entry
- Supplied with Keeper Plate
