AUXILIARY EQUIPMENT
LOGBOOK HOLDER

LOGBOOK HOLDER

FEATURES

- Robust, anti-corrosion powder-coated construction
- Three mounting holes at the back for easy wall-mounting
- Keyholder inside
- Easy document access
- Accommodates A4-size documents
- Perspex slide-in window
- Displays instructions for the end-user

DESCRIPTION

This logbook holder is designed to safely store a site's fire safety logbook. It should be wall-mounted close to the fire alarm control panel to ensure that the site's fire safety documents are securely stored and easily accessible.

The slide-in perspex window ensures the fire alarm panel's basic operation instructions are visible and available for reference by the end user at all times.

The steel enclosure has a hinged flip-top lid, accommodates an A4-size fire logbook and documents, and also offers key storage.

A fire logbook should be based on the SANS 10139:2012 recommendations and should contain the following:

- Guidance for the user to complete the logbook correctly
- Recommendations for Test and Inspections Intervals
- Weekly, Daily and Maintenance Log Sheets

The Fire Logbook can be purchased separately (see Ordering Information).
